Karanam Suhas

B.Tech CSE-AIML Student | Aspiring AI/ML Engineer

Email: karanamsuhas848@gmail.com | LinkedIn: Profile | GitHub: Profile

PROFILE

Second-year B.Tech student in Computer Science and Engineering (Artificial Intelligence and Machine Learning) at Sandip University. Interested in AI/ML, computer vision, generative AI, and creative technology. Building practical projects using Python and web technologies.

EDUCATION

B.Tech — Computer Science and Engineering (AI & ML)

Sandip University | 2025–2029 (expected)

TECHNICAL SKILLS

Programming: Python, C++ (basic), JavaScript (basic)

Web: HTML, CSS, JavaScript

Libraries / Tools: OpenCV, MediaPipe, Pygame, VS Code, Git, GitHub

Currently learning: Data Structures and Algorithms, Machine Learning, Generative AI

PROJECTS

Hand Gesture Volume Control

Developed a Python computer-vision project that uses a webcam and MediaPipe hand landmarks to control computer volume using the distance between the thumb and index finger.
Technologies: Python, OpenCV, MediaPipe

Hand Gesture Runner Game

Built a runner-style game controlled through webcam-based hand gestures, including left, right, and jump movements.
Technologies: Python, Pygame, webcam gesture control

Hospital Appointment System

Created a web-based hospital appointment system with an appointment booking form.
Technologies: HTML, CSS, JavaScript | Live demo
